

WARNING

WARNING: Risk of Electric Shock. Install power unit 5 feet (1.5m) or more from pool, spa or fountain.

WARNING: Risk of fire. If installation involves running wiring through a building structure, special wiring methods are needed. Consult a qualified electrician

DO NOT CONNECT TWO OR MORE POWER SUPPLIES IN PARALLEL

1. Do not connect the power unit to a 120V source controlled by a standard incandescent dimmer.
2. Wiring to connect the power unit to the luminaries shall be listed SPT-3, underground low energy circuit cable.
3. Do not use an extension cord when connecting the power unit to the 120V source.
4. Connect the power unit only to a covered 120V CLASS A GFCI receptacle marked "Wet Location" while in use.
5. Internal convenience receptacle for use only with plug-in clock operated switch or control module rated minimum 125VAC, 15A - do not connect electric drill or other appliance.
6. For use only with UL Listed low voltage landscape luminaires and fittings connected where the sum of their wattages does not exceed the maximum power unit circuit wattage.
7. The main secondary wiring is intended for shallow burial – less than 6 inches (152mm).
8. Case must be grounded.
9. Power unit door to be kept closed and secure under normal operation.

WARNINGS FOR USE IN CANADA

CAUTION: FOR USE ONLY ON A BRANCH
CIRCUIT PROTECTED BY A CLASS A TYPE
GROUND FAULT INTERRUPTER.

TOTAL LAMP WATTAGE PER
CIRCUIT FOR **ES150**: 150W

1. For use with landscape lighting systems only.
2. The device is accepted as a component of a landscape lighting system where the suitability of the combination shall be determined by csa or local inspection authorities having jurisdiction.
3. Do not connect two or more power supplies in parallel.
4. Power supplies are for outdoor use only.
5. Do not mount power supply or luminaires within 3 m of a swimming pool or spa.
6. Risk of fire. Do not place insulation under terminal plate. Check connection after installation.
